- Haren Textiles understands your needs and is delighted to work with you on enhancing your fabrics, developing new ones and refining existing ones.
- Haren Textiles is consistent, quick, and all fabrics come with an express written warranty
- Our Recycled Fabrics are GRS Certified.

Types of Coatings & Treatments at Haren

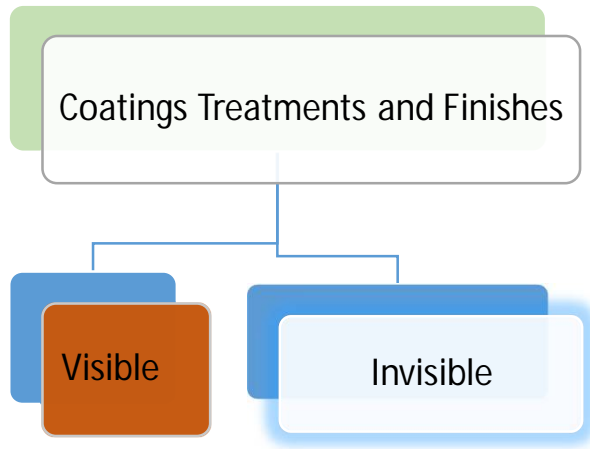

All certified to meet EU and US Standards

All are Wash Durable

100% Lead and Phthalate Free

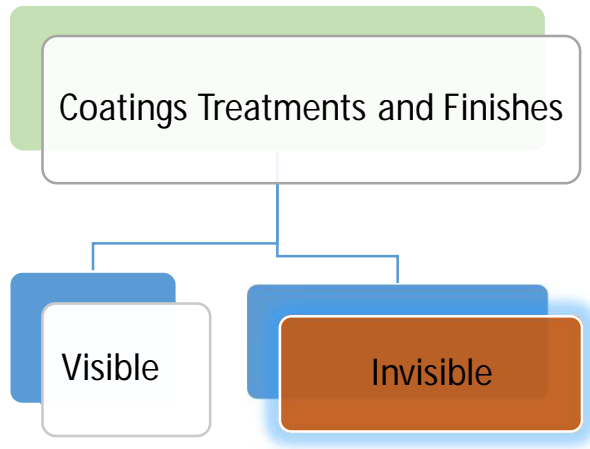

All are hypo-allergenic certified for next-to-skin uses

What are Visible Coatings

- These coatings can be “seen” and touched
- They are usually thicker & can be felt
- They engineered rigidity & flexibility, softness and stiffness as needed
- All are Breathable Waterproof, Stain Resistant, and Air permeable with MVTR Standards
- Example: PU coated fabrics are used in Outerwear, Outdoor Sleeping Bags, Backpacks Military clothing, commercial furnishings and PPE as Medical Textiles

What are Invisible Coatings?

- These coatings cannot be “seen” nor felt
- Fabric thickness remains unchanged
- Fabrics retain their ‘natural soft’ state
- Often soft, flexible and feel ‘ Fabric-like’
- Stiff and rigid can be done on request
- Excellent Breathability Comfort & Performance

Some Functional Fabrics are
Moisture Management, Wicking, Water Repellents,
Antibacterial, Anti Viral, Antimicrobials, UV Block etc etc
[refer to following pages]

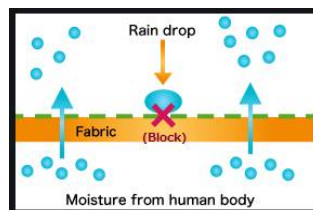

Haren's Coatings are fully customized as needed by you

Yes two or more coatings can be combined for enhanced performances

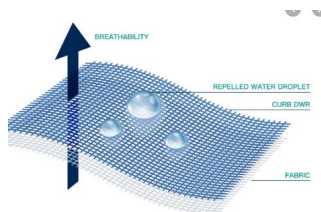

Invisible Coatings: Common uses

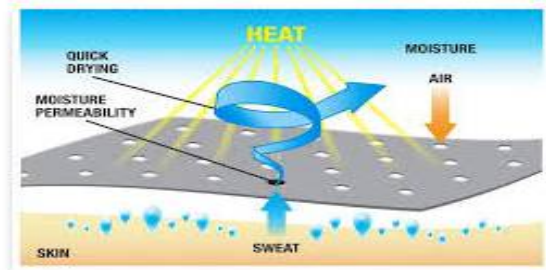

Aqua-Pel[®]

Fabrics are Soft, Breathable
Water Oil and Stain Resistance
Wash Durable and Easy Care

Dry-Max[®]

Absorbs perspiration, is quick drying, and feels cool. The superior wicking properties are often better than cotton. Drymax enhances comfort in hot wet and humid weather.

Being wash durable it has very long performance life.

Anti-STAT[®]

Excellent Static and conduction enhancer

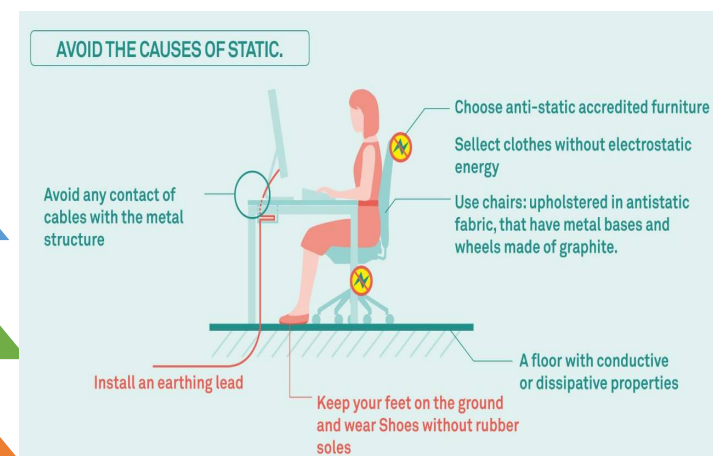

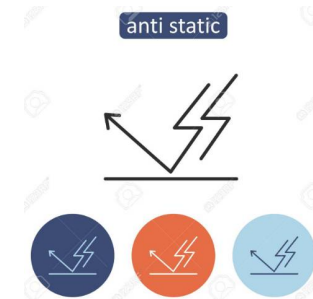

Makes the Fabric repel dust.

Fabric remain cleaner by not attracting and 'holding' onto dust particles

Used in: Clean room garments in Electronic & semi-conductor industries

Mattress, Sofa and Home Furnishings, & Apparels

And many applications where dust is a health concern

Baca-Tex EN[®]

Excellent bactericide and anti microbial and optional AntiViral.
The Fabric remains wash durable and effectively kills bacteria & Viruses on contact.

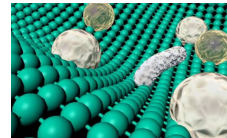

It does not allow new pathogens to take root.
Broad spectrum action against Gram Positive and Gram Negative Bacteria including staphylococcus bacteria.
Now when enhanced with AntiVirals, it can kill Virus as specified by ISO18184:2019

The Fabric remains mold resistance and anti fungal.

Common Uses:

Athletic and Sportswear
Home furnishing and Bed linen
Medical and hospital applications

Ever-Fresh[®]

Anti-MITE

Forms Invisible Mite Repellent Membrane On The Fabric Surface

Damp humid condition are ideal for mold, mite and bacteria growth .

Mite excretion is known to cause asthma.

Treated Mattresses have been effective in prevention of diseases such as allergic bronchitis, asthma, dermatitis, scabies

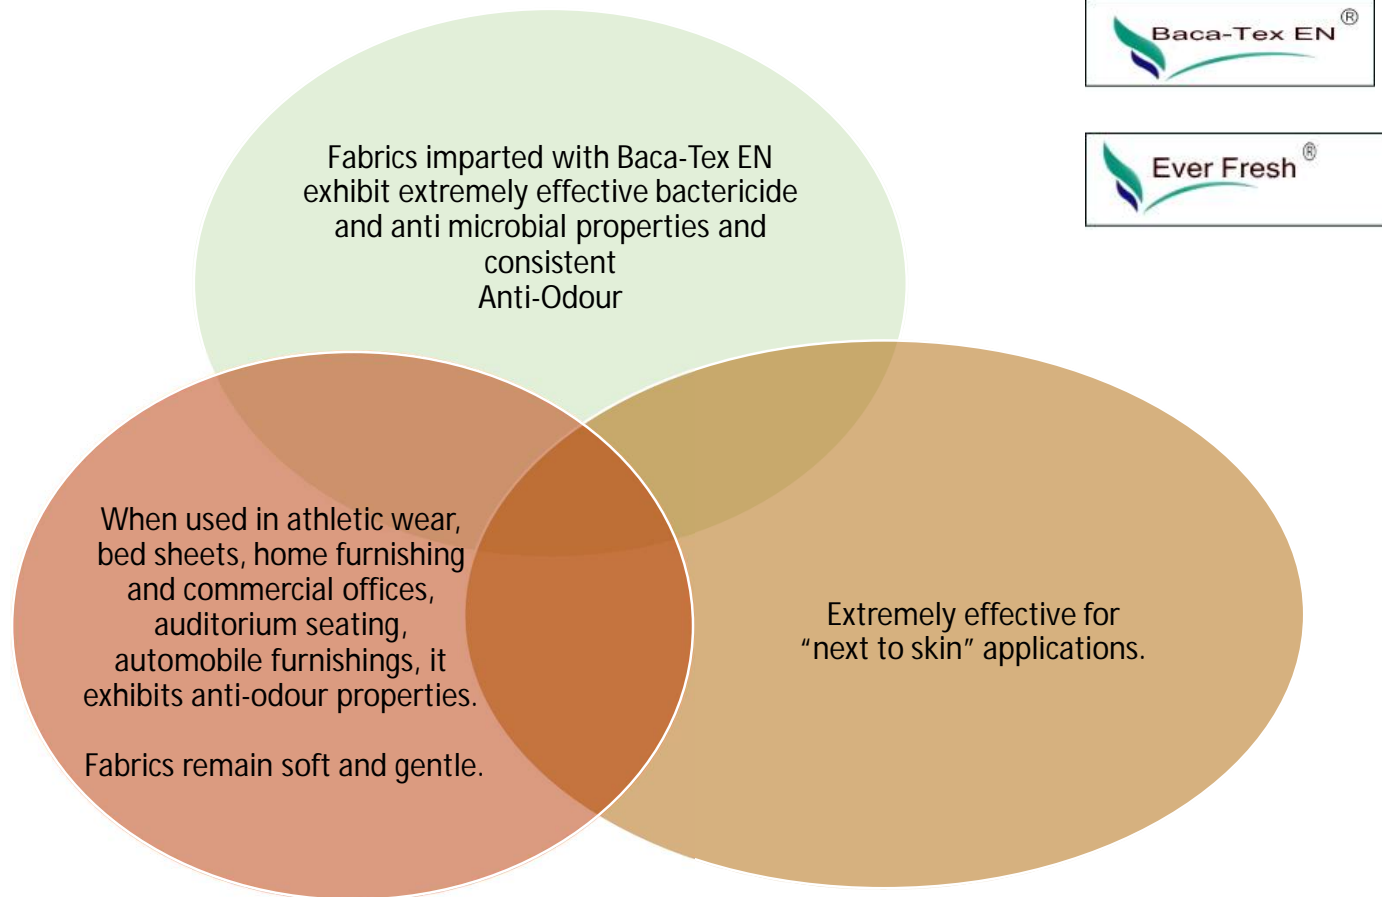

"...Babies and children are most susceptible to allergens. These allergens are caused by the dust mite.

Dust mites need warmth and humidity in beds to survive. With rising humidity levels fungi turn the dead skin into nutrients needed by mites. Mites multiply quickly, causing high levels of allergens.....

Only an effective anti-mite and antimicrobial treated beddings, mattresses and bed linens can solve this problem..."

Anti-Odour

®

Ez-Wash

Excellent anti stain properties.

Stops the fabric from 'holding' onto stains

Fabrics treated with Ez-Wash are easy to clean, easy to wash with little or no detergent.

Even the whitest soiled garment, apparel, furniture and chairs, regains its spotlessness easily and effectively.

European Union approved, under their Global Sustainable Initiative

Breathable and Stain resistance

Medi-PRO AB[®]

A fully treated & coated Anti-Blood Fabric, meeting WHO health standards for refugee and emergency medical needs for PPE for health care professionals.

Also meets PPE Standards of the Govt Of India.

This fabric is wash durable, fully breathable and autoclave-able fabric for the health and safety of nurses, doctors in trauma institutions and field hospitals, It is fully Reusable and recyclable.

Effectively blocks blood and body fluids from spilling onto surgeons and nurses during medical and surgical procedures.

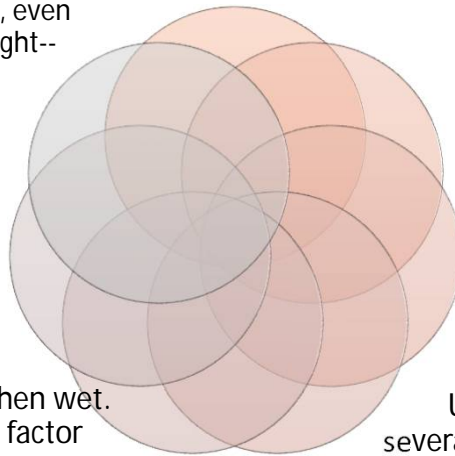

UV-Block®

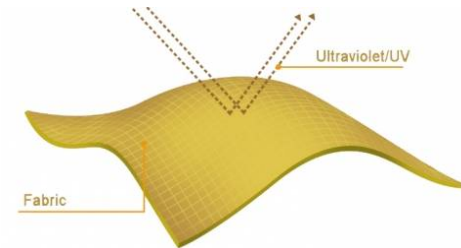

Excellent UV protection for swimwear
and outdoor fabrics

Fabrics do not fade, nor bleed, even
when exposed to direct sunlight--
when dry or wet

This fabric absorbs UV even when wet.
UV Block offers a protection factor
exceeding 45+

UV causes skin cancer to
several thousand people each year.

®

FlameGard

Fully Treated
Fire-Retardant
Fabric

Or

With Inherent
FR Yarns.

Meets NFPA701
[USA]
and
BS5852 [UK]

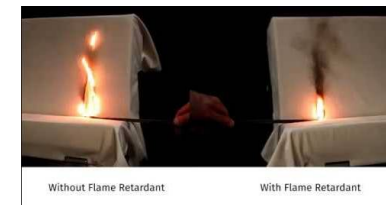

among many other
global standards for
Fire Safety.
